

FAT AND SUGAR CONTROL STICK

MEDIDIET[®]

6 g

PRODUCT

A lemon-taste fizzy powder which reduces fat assimilation and regulates sugar profile.

FORMAT

A 6g stick of powder to melt on the tongue.

INSTRUCTIONS FOR USE

To optimize the action of the active ingredients, let the powder melt on the tongue, step by step, after a meal. Use one to two Fat and Sugar Control Stick a day.

EFFECTS

The Fat and Sugar Control Stick is a perfect food supplement to :

Reduce fat absorption, thanks to the cactus fruit leaf extract NeOpuntia^{®*} rich in fibres which bind fat when reaching the stomach (in vitro test) and promote its natural elimination.

Reduce sugar absorption. The white kidney bean extract can partially inhibit the amylase activity (in vitro test), which decreases starch digestion and absorption and calorie intake.

Reduce glucose assimilation, thanks to a specific polyphenol extract from apple : phlorizin.

Regulate lipid and glycaemic profiles through the action of cinnamon on insulin sensitivity.

The carrier is made of xylitol which is known for its non-cariogenic properties and its ability to reduce the dental plaque.

STORAGE REQUIREMENTS

Store in a dry location at room temperature.

SHELF LIFE

2 years sealed in the original package and under normal storage conditions.
